

Headquarters Company

Greetings from Kuwait, where after recovering from jet lag, HSC leaders have developed a challenging training plan to ensure that all our Soldiers are confident and ready to move North. HSC Soldiers are focused on Warrior skills like land navigation, communications, and weaponry. We are practicing the good habits and reinforcing strict discipline that will keep us safe.

I have also enjoyed this opportunity to get to know your Soldiers better. We have a lot of characters in our company, and despite the seriousness of our mission, we can count on at least one good laugh a day. In order to allow our family and friends to share our experiences here, we've developed the HSC, 46th EN BN Family Readiness Group website, please contact the Rear Detachment for the URL address. There are already several pre-deployment pictures posted, as well as other contact information. Your input is welcome and appreciated. We will update the site frequently, so check back often.

Thanks for your love and support back home. "ROCK STEADY! ROCK HARD!"
